SOFTWARE DEVELOPMENT & DIGITAL SOLUTIONS

1. QR-Based Table Ordering Module

Core Features

- Restaurant ki 15tables ke liye unique QR codes.
- Customer bina app download kiye QR scan karke menu open kar sakega.
- Food categories: Steam Momos, Fried Momos, Tandoori Momos, Veg, Non-Veg, Drinks, etc.
- Customer food items select karke quantity choose kar sakega.
- Special instructions add kar sakega, jaise extra spicy ya extra chutney.
- Cart mein items, quantity aur total amount check kar sakega.
- Order submit hote hi table number ke saath receptionist panel mein show hoga.

2. Receptionist / POS Panel

Core Features

- Receptionistke liye separate login.
- Saari 15 tables ka live status: Available, Order Received, Occupied, Bill Pending.
- QR se aaye orders ko view aur accept karna.
- Receptionist khud bhi manual order create kar sakega.
- Order mein items add, remove aur quantity update kar sakega.
- Order cancel karne ki facility, with cancellation reason.
- Customer ka bill generate karna.
- Discount apply karna, subject to permission.
- Payment receive karke payment status update karna.
- Table ko bill settlement ke baad available mark karna.

3. Kitchen Order Ticket (KOT) Module

Core Features

- Accepted orderskitchen panel mein automatically show honge.
- Har order ke saath table number, items aur quantity show hogi.
- Customer ke special instructions visible honge.
- Order status: Pending, Preparing, Ready, Served.
- Kitchen staff order ko Preparing aur Ready mark kar sakega.
- Ready hone par receptionist ko order status dikh jayega.
- Digital KOT screen ya printer se kitchen order ticket print karne ka option.
- Ek order mein multiple food items hone par unki quantity aur preparation details visible hongi.

4. Admin Panel

Core Features

- Secure AdminLogin.
- Admin Dashboard.
- Total Orders, Today's Sales, Pending Orders aur Payment Summary.
- Receptionist accounts create, edit aur deactivate karna.
- Menu items aur categories manage karna.
- Food item prices aur availability update karna.
- 15 tables aur unke QR codes manage karna.
- Orders ki complete history dekhna.
- Billing aur payment records access karna.
- Date-wise reports view karna.
- Staff permissions manage karna.

5. Menu & Food Item Management

Core Features

- New food items add, edit aur delete karna.
- Food item name, description, image aur price manage karna.
- Veg aur Non-Veg item identification.
- Categories create aur manage karna.
- Food item ko Available ya Unavailable mark karna.
- Steam, Fried, Kurkure aur Tandoori jaise momos variants manage karna.
- Extra chutney aur additional items jaise add-ons configure karna.
- Price update hone par customer menu mein updated price show hona.

6. Billing & Payment Management

Core Features

- Orderke according automatic bill generation.
- Item-wise price aur quantity calculation.
- Subtotal, applicable taxes aur final payable amount.
- Cash, UPI aur Card payment entry.
- Payment status: Paid, Unpaid aur Partial Payment.
- Unique bill number generation.
- Bill print karne ki facility.
- Order-wise payment history.
- Authorized receptionist ya admin ke through discount apply karna.
- Bill settlement ke baad table ko available mark karna.

Note: Starter plan mein UPI/Card payment ki manual entry hogi. Automatic online payment gateway integration optional rahega.

7. Basic Sales & Reports Module

Core Features

- DailySales Report.
- Date-wise Sales Report.
- Total Orders Report.
- Order-wise Sales Details.
- Best-Selling Food Items Report.
- Payment Method Report.
- Cancelled Orders Report.
- Discount Report.
- Total Cash aur UPI collection ka summary.
- Reports ko CSV/Excel format mein export karne ki facility.

8. Basic Inventory Management

Core Features

- Rawmaterials add karna, jaise maida, vegetables, paneer aur sauces.
- Available stock quantity maintain karna.
- Stock ki manual quantity update karna.
- Low Stock Alert.
- Inventory items ki list aur current quantity dekhna.
- Stock inward entry, jab naya material purchase ho.

Starter plan mein automatic recipe-based stock deduction, supplier management aur advanced purchase management include nahi honge.

9. Complete Order Workflow

01 **Customer QR Scan**
CustomerapnitablekaQR scan karke menu open karega.

02 **Order Placement**
Customeritemsselectkarke order submit karega.

03 **Receptionist Approval**
Receptionistordercheckkarke accept karega.

04 **Kitchen Order Ticket**
Acceptedorderkitchenpanel mein show hoga aur preparation start hogi.

05 **Order Ready / Served**
KitchenorderkoReadymark karega, phir staff Served mark kar sakega.

06 **Billing & Payment**
Receptionistbillgenerate karke payment receive aur record karega.

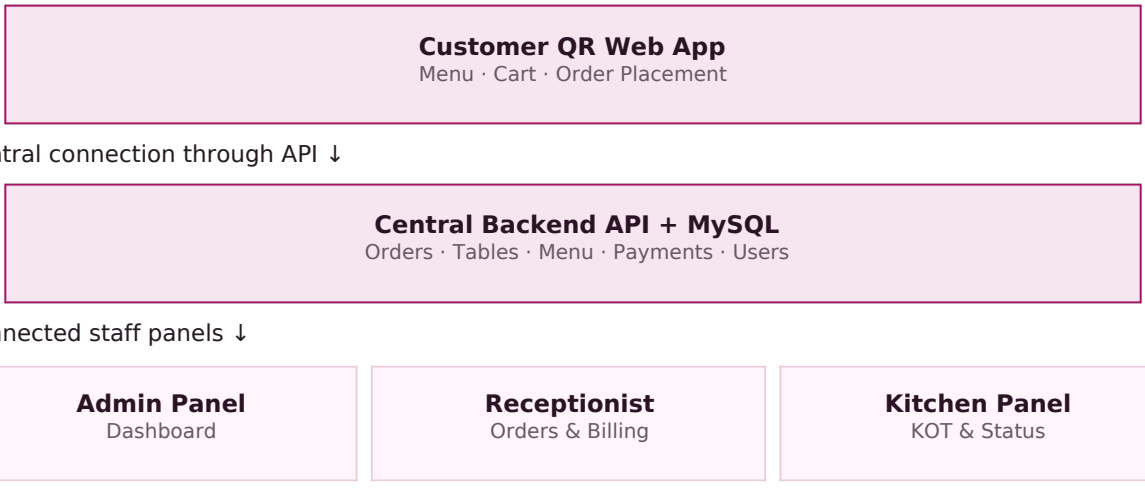

Important Rule: Customer QR se order place kar sakega, lekin order receptionist ke accept karne ke baad hi kitchen ki active order queue mein jayega. Isse duplicate aur incorrect orders ka risk kam hoga.

10. Starter Plan - Final Scope

Module	Included Features
Tables	15 Tables
QR Ordering	Unique QR per table
Customer Panel	Mobile-responsive web menu
Receptionist Panel	Orders, tables and billing
Kitchen Panel	KOT and order status
Admin Panel	Dashboard and management
Menu Management	Categories, items, prices
Billing	Automatic bill generation
Payments	Cash, UPI and Card entry
Reports	Basic sales and payment reports
Inventory	Basic stock and low-stock alerts
User Management	Admin and Receptionist roles

11. Technical Architecture

Bhai, meri recommendation hai ki ek hi backend aur database rakho, jisse saare panels ek doosre se connected rahein.

Recommended Technology Stack:

- Frontend: React.js + TailwindCSS.
- Backend: Laravel API ya Node.js + Express.js.
- Database: MySQL.
- Real-time Order Updates: WebSockets ya suitable real-time mechanism.
- Hosting: Production-ready web hosting with SSL.

- Interface: Desktop, tablet aur mobile responsive design.

Saare panels same API use karenge, jisse order, payment aur table status ka data synchronized rahega.

12. Starter Plan Mein Abhi Include Nahi Karenge

Ye features future Intermediate ya Advanced Plan ke liye rakhe ja sakte hain:

- Online Payment Gateway Integration.
- Customer Loyalty Points aur Rewards.
- WhatsApp/SMS Automation.
- Multi-Branch Restaurant Management.
- Advanced Inventory aur Recipe-Based Stock Deduction.
- Supplier aur Purchase Management.
- Delivery Boy App aur Route Optimization.
- Customer Membership aur Offers System.
- Advanced Analytics aur Profit/Loss Management.

Bhai, meri final recommendation: Starter plan mein QR Ordering + Receptionist POS + Kitchen KOT + Admin Dashboard + Billing + Basic Reports ko priority do. Ye restaurant ke 15 tables ke liye ek practical aur complete first version hoga.
